ABOUT MYSELF

I am currently pursuing an MSc in Data Science at the University of Debrecen, where I am developing strong foundations in machine learning, statistical analysis, and data engineering. With a passion for turning data into actionable insights, I'm seeking internship opportunities in data analysis, data science, or data engineering.

I bring over a year of prior experience in software and web development, but I am now focused on advancing my career in data-centric roles. I'm continuously building my skills in Python, SQL, data visualization, and cloud platforms. Ability to learn and use new technologies quickly.
